## Looking At Our 2020 Class Census Data – Part 1

Feel free to compare your line plots with the line plots Mr. Zutter made from your class census data. If there is a difference, please check your work. Don't worry if there is a little difference between your line plots and the ones Mr. Zutter made as he might have made mistakes, too 😊.

### Household Size

1. Look at the *Household Size* line plot you made from your class census data. What are some things that you notice about sizes of households for students in your class? Make a bullet point list of those things on the lines below. Remember that each "X" on the line represents one household.

### Ages of People in a Household

1. Look at the *Ages of People in Household* line plot you made from your class census data. What are some things that you notice about ages of people in households for students in your class? Make a bullet point list of those things on the lines below. Remember that each "X" on the line plot represents the *age* of one person.
