- Return your completed card to Mrs. Adriane Smith during the first week of school to participate in a special themed lunch.

Example: + AS 6/2	Example: EDM AS6/3							

What is math fact fluency? Math fact fluency is the ability to recall the answer to math facts (0-10) automatically. (Ex: 8 x 3; 2 x 9)

How can I practice math facts? There are many games you can play to improve fact fluency (search “games to practice math facts.”) Flash cards are still a great way to practice math facts. The sites www.99math.com, www.xtramath.org and many apps are available for practice. Investing a few minutes each day will pay off in mastering basic math facts.

Can I do Edmentum Math? Until accounts are rolled over for the new school year, students have access to this wonderful program that lets them practice math skills chosen specifically for them. It is suggested for students to complete at least 40 minutes of Edmentum each week.
